

**IMPROVE YOUR  
ORGANIZATION  
CYBERSECURITY WITH  
ISO/IEC 27032:2012  
Certification**

The global evolution of technology has resulted in a rapid increase in the number of cyber-crimes and cyber-attacks. Cybersecurity helps you understand the practical measures and controls information security risks to stay protected from attacks. **ISO/IEC 27032** is part of the ISO 27000 family of standards, which provides technical guidance for addressing common Cybersecurity risks, including social engineering attacks, hacking, malware, spyware, and other potentially unwanted software. The Standard provides guides for improving information security, network security, internet security, and critical information infrastructure protection (CIIP)

**ISO/IEC 27032:2012** provides guidance to prepare an organization’s cybersecurity ICT systems to detect and respond to emerging security events, including Cybersecurity events.

Relationship between cybersecurity and other security domains (ISO/IEC 27032:2012)

**WITH CBOA GLOBAL EXPERTISE AND PROVEN TRACK RECORD IN ICT SECURITY, WE PROVIDE THE FOLLOWING SERVICES:**

- Gap analysis assessment against ISO/IEC 27032:2012
- ISO/IEC 27032:2012 Certification
- Training

**BEGIN YOUR ISO/IEC 27032:2012 CERTIFICATION WITH US!**
