

**STRENGTHEN YOUR
STRUCTURED PROCESS WITH
ISO 19650**

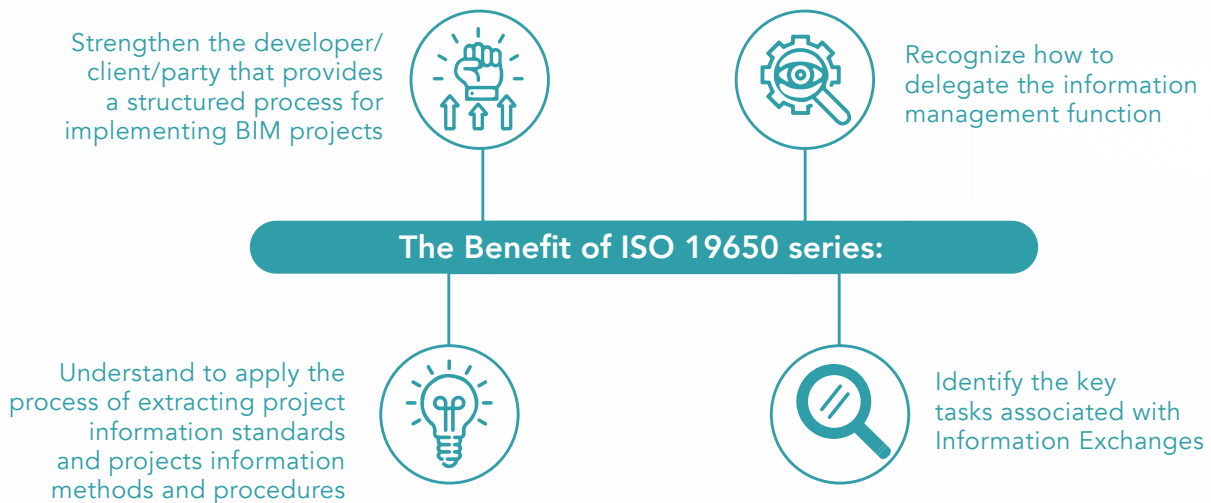

Building Information Modelling (BIM)

ISO 19650 is standardization for international organizations for organizing information on work in the construction sector. Building Information Modelling will covering all the key from design, information management, facilities management, and security.

Part of ISO 19650 such as:

- ISO 19650-1: Carry out design concepts and principles for the organization and digitization of building information in civil engineering work
- ISO 19650-2: The stage of asset delivery from a model to the organization and digitization of building information on civil engineering work
- ISO 19650-3: The stage of working on capital assets for the organization and digitization of building information on civil engineering work

WHY DO WE NEED BIM?

- Improved Software interoperability
- Organization can centralized data capture
- Manage decisions in a model; design process and improved communication
- Established workflows and project deliverables that improve collaboration, reduce rework and errors
