

CBQA Global Verified Mark

DIGISAFE

**IN
A CONNECTED
WORLD,
A SINGLE
VULNERABILITY
CAN ERODE
ALL TRUST**

In today's data-driven economy, how you handle personal information defines your brand. Customers are more aware of their digital rights than ever before, and global regulations like GDPR and UUPDP have raised the stakes for non-compliance.

They expect your application, SaaS platform, or IoT device to be not only functional but fundamentally comply with privacy compliance.

The critical questions are no longer **"if"** you will be targeted, but **"how prepared"** you are:

- How do you prove to your clients that your product is a safe choice?
- Can your application withstand common cyber-attacks?
- Is your customers' data properly protected from breaches?
- Are you losing deals because you can't pass rigorous vendor security questionnaires?

Claiming to be secure is easy. Proving it is essential.

V-Mark PrivacySafe: The Hallmark of Data Trust & Ethics

The CBQA Global V-Mark DigiSafe is a specialized trust mark focused purely on the technical security and operational resilience of your digital product.

This is not a privacy audit. It's a security verification. While a privacy certification focuses on **what** data you collect and **why**, DigiSafe verifies **how well** you protect your product and the data within it. It's the difference between a bank's privacy policy and the strength of its vault.

Displaying the DigiSafe mark demonstrates that your product's security isn't just a feature—it's a verified, foundational pillar of its design.

To earn the V-Mark DigiSafe, your product is rigorously assessed against four fundamental pillars of digital security.

The Benefit of DigiSafe

Build Trust, Accelerate Growth, and Reduce Risk

The V-Mark DigiSafe is more than a logo; it's a strategic business asset

Build Instant Credibility

Differentiate your product in a crowded market with a clear, independent mark of security excellence.

Protect Your Brand

Reduce the risk of a damaging data breach and the associated reputational and financial costs.

Demonstrate Technical Maturity

Show the market that you invest in the foundational quality and security of your product, not just its surface-level

Provide Customer Assurance

Give your users the confidence that their data and operations are safe with you.

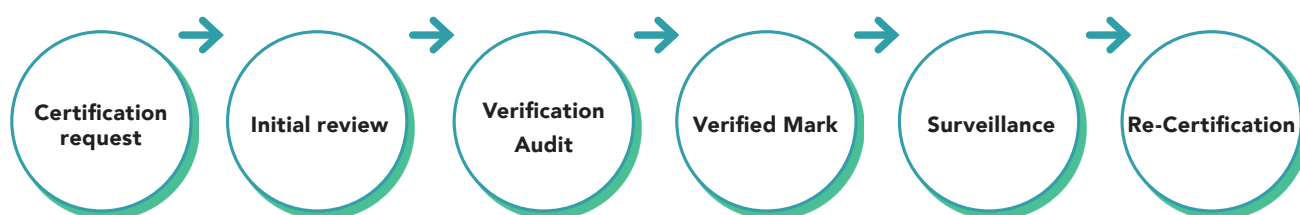

Win More Deals

Overcome security objections in the sales process and pass vendor security reviews with ease.

Are you a DigiSafe Platform Provider?

Partner with CBQA Global to earn the Verified Mark and empower your clients with verifiable data.

OUR PROCESS IS VERY STRAIGHTFORWARD

The Path to Compliance

Scoping & Gap Analysis

We start by understanding your product's architecture and identifying its security posture.

Certification & Reporting

Upon successful verification, you receive a detailed report and the license to use the V-Mark DigiSafe.

Technical Assessment

Our security auditors conduct a series of tests and reviews based on the four DigiSafe pillars.

Continuous Assurance

We perform periodic surveillance to ensure your security posture remains strong as your product evolves.

**ARE YOU LOOKING FOR A DIGISAFE PLATFORM?
LOOK FOR THE CBQA Global VERIFIED MARK –
YOUR ASSURANCE OF DATA RELIABILITY AND PEACE OF MIND**

IS YOUR PRODUCT DIGISAFE? PROVE IT.

Don't just tell your customers you're secure. Show them. Earning the CBQA Global V-Mark DigiSafe is the most effective way to demonstrate your commitment to digital security and build unbreakable trust.
