Training Syllabus

IMPLEMENTATION ISO 14064-2:2018 TRAINING

GENERAL INFORMATION

DESCRIPTION

This training provides a comprehensive understanding of ISO 14064-2:2019 requirements and guidance at the project level, focusing on the quantification, monitoring, and reporting of greenhouse gas (GHG) emission reductions or removal enhancements. Participants will gain both theoretical knowledge and practical insights applicable to organizational and project implementation.

EXPECTATIONS AND GOALS

By attending the program, candidates are expected to be able to:

- Understand the structure and requirements of ISO 14064-2:2019.
- Be able to define project boundaries and baselines.
- Learn approaches for quantification and monitoring of GHG projects.
- Know how to manage data quality and reporting requirements.
- Gain insights into verification and validation considerations.

WHO SHOULD ATTEND

- Environmental managers and sustainability officers
- GHG project developers and consultants
- Professionals in climate change, carbon management, and corporate responsibility
- Internal auditors and compliance officers related to GHG projects

PROVIDED MATERIALS

You will get the following materials to support you during the training

- The training module and case studies
- Certificate of Attendance or Certificate of Success

2 days
