AWARENESS

ISO 31000:2018

TRAINING

GENERAL INFORMATION

DESCRIPTION

ISO 31000:2018 was developed on the ground to the long-term success of an organization by managing their risk, such as providing a level of reassurance in terms of economic resilience, professional reputation, and environmental and safety outcomes. ISO 31000 is tailor-made for any organization seeking clear guidance on risk management. (source: www.iso.org)

ISO 31000:2018 applies to all organizations, regardless of type, size, activities, and location, and covers all risk types.

Awareness training is a one-day program covering the basic concept and requirements of ISO 31000:2018 Risk Management-Guidelines. The training provides insight into the advantages of implementing Risk Management to business, society, and government.

UNDERSTANDING ISO 31000:2018 TRAINING

GENERAL INFORMATION

DESCRIPTION

ISO 31000:2018 provides direction on how companies can integrate risk-based decision-making into an organization's governance, planning, management, reporting, policies, values, and culture. (source: www.iso.org)

ISO 31000:2018 training will give management representatives and people responsible for management systems the tools and techniques to enable the practical application of risk methods to their systems. This training provides participants an understanding of risk management concepts with valuable tools to implement risk management.

Understanding training is a two days program that aims to introduce and essential elements of the Risk Management System's different modules, including policy, procedures, performance measurements, management commitment, internal audit, management review, and continual improvement.

EXPECTATIONS AND GOALS

By attending the program, candidates are expected to be able to:

1. Explain the principles of Risk Management System
2. Understand and describe the framework of risk management based on the 11 principles
3. Understand the approaches, standards, methods, and techniques used for the implementation and management of a Risk Management System
4. Identify the procedure used to conduct risk identification, risk analysis, risk evaluation, and risk treatment

WHO SHOULD ATTEND:

Individuals involved in ISO 31000:2018 implementation

- Professionals in organizations that manage the risks and opportunities in their areas of responsibility
- Individuals interested in pursuing a career in risk management
